ENROLLMENT

An enrollment website with features similar to the existing animo.sys of DLSU specifically for BS Information Systems (BSINSYS) students.

FEATURES

Register

A student must register if they want to enroll in a class. A student must enter their ID number, email address (DLSU email), password, college, and degree program.

a. Verification of Email Address

The student will receive a one-time password (OTP) in his/her email to verify his/her account.

Log in

After registering properly, a student may log-in using his/her ID number and password. Upon logging in, the user can start navigating through the system.

Log out

The user may log out from their account.

View own user profile

Each student user has their own page which shows their profile and his/her information. This is not viewed by the other users. On the page, the user may see the information he/she used to register. All courses under the degree program can be accessed. This includes completed courses which are checked in the display.

View all offered classes

The user can see the list of all classes being offered for his/her degree program. The information about the classes includes the class number, course code, course name, section, class day(s), class time, number of units, room, and faculty.

Search and display classes

A student can search for classes by using the class number, course code, or keyword from the course name. The page then displays the results according to the search made by the user.

Add classes

A student can add a class that does not exceed the given total units per term. The class to be added must fit the current class schedule.

Drop classes

The user may remove a previously added class from their schedule.

Swap classes

A student can swap a selected class with another available class that fits the class schedule.

View summary of enrolled classes

The student can view a summary of his/her classes. This would include the course code, section, number of units, class day(s), class time, room, and faculty. The student can also see his/her student information and total number of units.

General

Good user experience. Visitors can easily navigate without help, all information is easy to access. Good visual design. Design suits the theme of the application, and is cohesive and consistent across the whole application.
